

Performance Marketing Workflow

1. Research & Discovery Module

Purpose: Build strategic foundation

Owned by: Performance Team

Inputs:

- Market & category research
- Competitor analysis
- Audience insights
- Platform trends & historical data

Output:

- Research summary + benchmarks

Status: → **Research**

2. Campaign Intake & Objective Definition

Purpose: Capture client requirements

Owned by: Client + Performance Team

Inputs:

- Campaign objective (Leads / Sales / Traffic)
- Target geo & audience
- Budget & duration
- KPI alignment (CPA, CPL, ROAS)

Output:

- Campaign brief created

Status: → **Draft**

3. Strategy & Planning Module

Purpose: Define execution approach

Owned by: Performance Team

Actions:

- Platform selection (Meta, Google, LinkedIn)
- Funnel mapping (TOF / MOF / BOF)
- Audience segmentation
- Budget allocation

Output:

- Strategy document

Status: → **Planning**

4. Internal Review & Alignment

Purpose: Ensure quality before client exposure

Owned by: Internal Stakeholders (Team Leads / Strategy Heads)

Flow:

- Strategy review
- Feedback incorporation
- Final internal sign-off

Status: → **Internal Review** → **Approved for Client**

5. Client Proposal & Approval

Purpose: Validate direction with client

Owned by: Client + Account Manager + Performance Team

Flow:

- Proposal presentation to client
- Feedback loop (edits / refinements)
- Final approval

System Requirement:

- Approval tracking
- Version control

Status:

- Client Review → Changes Required → **Client Approved**
-

6. Asset & Access Setup Module

Purpose: Prepare execution environment

Owned by: Performance Team + Client

Actions:

- Platform access requests (Meta, Google, LinkedIn)
- Landing page / form confirmation:
 - Website forms or platform-native forms
- Tracking alignment:
 - Pixel setup
 - Event definitions

Dependency:

- Requires client inputs/access

Status: → **Setup in Progress** → **Ready for Creative**

7. Creative Brief → Production → Approval

Purpose: Manage full creative lifecycle

Owned by: Performance Team + Creative Team + Client

Flow:

1. Creative brief shared internally
2. Creative production (Design Team)
3. Internal review (brand + performance alignment)
4. Client review & feedback
5. Final approval

System Requirement:

- Multi-level approval tracking
- Creative version control

Status:

Draft → Internal Review → Client Review → **Approved**

8. Campaign Setup Module

Purpose: Build campaign structure

Owned by: Performance Team

Setup Includes:

- Campaign hierarchy (Campaign → Ad Set → Ads)
- Audience mapping
- Budget setup
- Placement & bidding
- Tracking (pixel, UTMs)

System Checks:

- Missing tracking alerts
- Budget validation

Status: → **Setup Complete** → **Ready to Launch**

9. Final Pre-Launch Approval

Purpose: Ensure all stakeholders aligned before go-live

Owned by: Performance Team + Client (if required)

Checklist:

- Creatives approved
- Tracking validated
- Budget confirmed
- Landing pages live

Status: → **Approved for Launch**

10. Launch & Platform Validation

Purpose: Go live with monitoring

Owned by: Platform + Performance Team

Flow:

- Campaign launched
- Platform review (~24 hours)

System Checks:

- Ad approval / disapproval
- Delivery status
- Tracking accuracy

Status:

Live → Under Review → **Active**

11. Learning Phase Monitoring

Purpose: Stabilize performance

Owned by: Performance Team

Benchmarks:

- Meta: 3–7 days
- Google: ~5 days

- LinkedIn: ~24 hours

Rules:

- Limited edits
- Monitor CTR, CPC, delivery

Status: → **Learning**

12. Performance Optimization

Purpose: Improve efficiency

Owned by: Performance Team

Actions:

- Pause low-performing creatives
- Scale high-performing segments
- Refine audiences
- Identify funnel drop-offs

System Triggers:

- High CPA
- Low CTR
- Conversion drop

Status: → **Optimizing**

13. Mid-Campaign Review & Client Feedback (~2 Weeks)

Purpose: Strategic alignment

Owned by: Performance Team + Client

Flow:

- Share performance report
- Discuss:
 - CPA / CPL

- Lead quality
- Recommend:
 - Scaling
 - Strategy changes

Status: → **Client Feedback** → **Scaling Decision**

14. Creative Fatigue & Refresh Cycle

Purpose: Maintain performance

Owned by: Performance Team + Creative Team + Client

Triggers:

- High frequency
- CTR drop
- Rising CPA

Flow:

- New creative request
- Internal + client approval
- Relaunch / update ads

Status: → **Creative Refresh**

15. Ongoing Campaign Management

Purpose: Maintain stability

Owned by: Performance Team

Actions:

- Budget optimization
- Audience expansion/refinement
- Placement adjustments
- Lead quality monitoring

Status Flow:

Optimizing → Scaling → Stable

16. Monthly Iteration (For Always-On Campaigns)

Purpose: Continuous improvement

Owned by: Performance + Creative + Client

Flow:

- Monthly reporting
 - Creative refresh
 - Messaging updates
 - Strategy adjustments
-

17. Final Reporting & Feedback Loop

Purpose: Close campaign lifecycle

Owned by: Performance Team + Client

Outputs:

- Spend vs results
- CPA / CPL
- Lead quality

Feedback Loop:

- Learnings → fed back into research for next campaign
-

Complete System Flow

Research → Draft → Planning → Internal Review → Client Approval → Setup → Creative
Approval → Pre-Launch Approval → Live → Learning → Optimizing → Client Review → Scaling
→ Refresh → Stable → Reporting
